

If it's important, encrypt it™

BlackSquare Technologies

GSA Price Sheet (Pricing valid through 9-30-2018)

GENERAL PURPOSE COMMERCIAL INFORMATION TECHNOLOGY EQUIPMENT, SOFTWARE, AND SERVICES GSA Schedule GS-35F-0311R FSC Group 70 FSC Class 70 Contract Period: 02-FEB-2005 through 02-FEB-2020 Awarded Special Item Numbers (SIN): 132-8

Supplier: BlackSquare Technologies, LLC

Product Family & Description:

Enigma is both transparent to the operating systems and is independent of the OS while performing encrypt or decrypt operations.

- Enigma may be used on any WIN or MAC computer, notebook or tablet with an active USB port, and has been designed for non-classified usage.
- Enigma is a patented, manageable hardware encryption and key management product.
- Enigma has been designed around USB protocols, and is a removable IT device.
- Enigma is a two-factor authentication (2FA) device.
- Enigma allows a user to 'change passwords' which are used to encrypt data (suitable for managing confidential data for multiple clients).
- Enigma has been certified as FIPS140-2 compliant.
- Enigma may look like a USB thumb drive but does NOT store data. A USB storage device (Thumb drive, Backup or external drives) must be connected to Enigma to initialize and authenticate to the tool.
- Enigma does NOT have a back door.
- PLEASE RECORD YOUR PASSWORDS

Once the user has authenticated to Enigma, he/she may access data on the computer's hard drive; on an external backup or USB storage device; on a NAS storage or a Server or a Container, or, in ANY cloud based application (including government approved cloud solutions). For more information, please refer to the illustrations in this document.

Model Type:

Enigma SMB USB patented, manageable hardware encryption and key management IT device.

Part number & explanation:

See part numbers below. If you have any questions, please consult with our client support experts at info@blacksquaretechnologies.com, or call 303-915-4164 for immediate support.

Base product:

BlackSquare Enigma USB Small & Medium Business device with 1-year subscription included

If it's important, encrypt it™

Product Description:

- Transparent to WIN and MAC operating systems for all computers, notebooks and tablets with accessible USB ports.
- Enigma SMB units may be used to create a 'trusted user network' where each user may have knowledge of a password which has been shared with other users in that network.
- Performs all encrypt and decrypt operations independent of the operating system
- FIPS 140-2 level 2 certification, AES 256 CBC mode.
- CHANGE PASSWORD feature allows user(s) to create another password to manage unique files.
- WRITE PROTECT features (2) allow the protection of downstream USB SSD storage device's Master Boot Record (MBR) to prevent multiple forms of attack (Enigma may be engaged as a firewall).
- Simple to set up and use in less than 2 minutes.
- Enigma does not have a 'back door'.
- All units come with a 1-year subscription for updates to our WIN and MAC features: we are always improving Enigma. Additional years are optional at \$30 per user per year.
- We offer several 'how to' videos at this link:
